

## **PACKING POINTERS & CHECKLIST**

**Our best advice? To have a trusted family member or friend (or a group of them) help you prepare and pack, months in advance.** Pace yourself and give yourself time to de-clutter, sort and scale back to your favorite items, something that can feel good with enough time and a supportive team on your side. Look at this as a time to reaffirm your favorites and to keep what matters.

Once you sort everything, you can always enlist a professional packing and moving team to take care of the rest.

If you don't know where to begin, someone from our team can visit your home and help you get started, talking with family members, providing tips on what other residents bring along, even providing a list of charities for donations, professional packing and moving services and more.

### **In the meantime, some pointers to pack happy:**

#### **SORT YOUR BELONGINGS, ROOM BY ROOM**

Make separate piles for giving away (label with name), donate, sell, throw away or keep. If you're not sure where to begin, someone from your senior living community can give you space and packing guidelines.

#### **SCHEDULE A TIME TO GET RID OF ITEMS**

Have family or friends help by picking up items you've gifted to them, taking items to be donated to charities or arranging for them to be picked up, or organizing a yard sale. If you're not sure where to begin, ask your Community Relations Director for references to charities that need items and can pick them up for you.

#### **PACKING SUPPLIES**

Make sure you have all packing supplies to get started: storage bins, boxes, plastic bags, trash bags, labels and markers OR hire a moving service to pack for you. If you're not sure who to call for packing and/or moving help, ask your Community Relations Director for references.

## **PACK & PLAN FOR YOU NEW SPACE**

Ask for a floor plan of your new residence, with measurements. Then measure your favorite furniture pieces to make sure they fit comfortably. You can also visit furnished models and take photos to get an idea of desired layout options.

## **FURNITURE**

We suggest touring a furnished model to get a feel for the space and furniture layout. You will also have room dimensions, so we encourage you to measure your furniture pieces to ensure the best fit.

- Bed (frame, box spring, mattress and bedding. Be sure to check your floor plan to confirm the size bed that will best fit your space).
- Nightstand
- Dresser and/or Chest of Drawers
- Seating (small sofa, chairs with arms, rocker)
- Small Kitchen Table and Chairs
- Side Table(s)
- Tall Console Table

## **KITCHEN**

This is most likely where you'll need to edit the most. Keep in mind you'll have a smaller kitchenette with plenty of space for one. You also have access to restaurant-style dining, with a menu and snacks prepared by a chef, so you probably won't need as many food prep materials as before.
